

The Deep State

Have you heard the news?

"The Deep State is a threat to our democracy!", (1) The President of the United States Donald J Trump claims in a recent video. Should we take this seriously? Let's investigate.

However, It has reported that Donald Trump Lies an Average of 8 times a day since he was elected as President. (2)

However, it is possible with present-day technology (often used in Hollywood) to create computer-generated voice copies (3) and stunningly realistic visual effects. So, we're going to have to take a closer look at these news sources and the alleged, "Deep State".

Before we can define the Deep State, we must first define the State. "The History of the Culture of War", written by Dr. David Adams has outlined 5,000 years of history and 11 Major State components; .

1. Armies and armaments
2. External conquest and exploitation: Colonialism and
3. Neocolonialism
4. The internal culture of war and economies based on the exploitation of workers and the environment
5. Prisons and penal systems
6. The military-industrial complex
7. The drugs-for-guns trade
8. Authoritarian control
9. Control of information
10. Identification of an "enemy"
11. Education for the culture of war
(4)

In 1921 Max Weber defined The State as having a "monopoly on the legitimate use of physical force within a given territory." (5) In 2014 Mike Lofgren, a former Republican U.S. congressional aide described The Deep State as "...Able to govern - without reference to the consent of the governed". (6) And In the book authored by Dr. Adams, "World Peace Through Town Hall", Adams comes to the conclusion that "The State is not compatible with a Culture of Peace by its very definition." (7)

How could this be? What's going on behind this Deep State, is it the Illuminati? In order to

understand what's going on, first, we must discuss, "The Systematic Distortion of Information", A science Article co-authored by David Bella, A retired Civil Engineer & Emeritus Professor at Oregon State University.

In, "The Systematic Distortion of Information", it is explained how communication difficulties amongst groups of people can result in disorganization, chaos and even death. The major contributing factors to this Distortion of Information, as outlined by Emeritus Professor Bella;

1. Limited Perception Affecting Decision Making
2. Biased Decision-Making Affecting Group Decision Making
3. Communication Difficulties affecting Communication in Organizations

The article closes with a suggestion of "Radically different forms of organization or maybe the use of intelligent communication systems..." in order to lessen the effect of disinformation. (8)

This may not sound as exciting or novel as The Illuminati Conspiracy, but it does provide an important scientific basis for why a government fails to represent the rights of the governed, and it does not make the threat any less real. For example, Democide is a word defined as, "the intentional killing of an unarmed or disarmed person by government agents." it has been estimated 262 million victims of democide in the last century alone. (9) (10)

The purpose of our Federal Government, as found in the Preamble of the Constitution, is to "establish Justice, insure domestic Tranquility, provide for the common defense, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our posterity." In 1791, a Bill of Rights was added to guarantee inalienable rights. Since the Declaration of Independence and the Constitution, since then, more declarations have been unanimously agreed upon by more and more citizens, including, but not limited to; The Universal Declaration of Human Rights (1948), the Rights of the Child (1989), Declaration of a Culture of Peace (1999), The Rights of Indigenous Peoples (2007), The Rights of Mother Earth (2010). As defined and outlined by this paper, The Deep State is to blame for our Government's inability to guarantee the citizens the rights which they have declared.

First, it was discovered and defined that the threat to our democracy: The Deep State, has the ability to govern (and kill) without reference to the consent of the governed. Through scientific methodology, it was discovered that the underlying mechanism giving rise to the phenomenon known as, "The Deep State," - is a result of the Systematic Distortion of Information.

The Deep State is a real phenomenon of Governments acting without the consent of the Governed. As a representative of the people it is expected that a government will protect and secure the population's basic needs, this includes all the citizens's individual and environmental health. The Deep State is not only a threat to our democracy, The Deep State is a threat to our lives.
